Genetron Health Announces Forthcoming Unveiling of Its Cancer Research Papers at the AACR Annual Meeting

April 20, 2020

Beijing, 20 April 2020 - Genetron Holdings Limited ("Genetron Health"), a China-based precision oncology company that covers full-cycle cancer care, announced that 14 cancer research papers will be presented as posters at the American Association for Cancer Research (AACR) 2020 Annual Meeting, which will take place virtually on April 27-28 and June 22-24.

In collaboration with over 10 notable cancer research centers and clinical hospitals in China, including the Chinese PLA General Hospital (301 Hospital), Cancer Hospital of Chinese Academy of Medical Sciences, Beijing Tiantan Hospital of Capital Medical University, Genetron Health's presentation will cover a broad spectrum of precision oncology topics such as molecular and immunological diagnostics, bio-informatics analysis in multiple cancer types including lung cancer, gastric cancer, central nervous system tumors and urinary system tumors.

Scientists at Genetron Health with a multi-disciplinary background have devoted significant resources to continuously optimize key diagnostics technologies including liquid biopsy, fusion detection, and algorithms for bioinformatics. They focus on improving the quality and efficiency of sample testing, as well as the comprehensiveness and stability of bioinformatics analysis. Genetron Health has accumulated clinically valuable data in the fields of diagnostics, neoadjuvant chemotherapy prognosis and efficacy evaluation, immunotherapy, and drug resistance to facilitate translation into clinical applications.

Genetron Health actively collaborates with clinicians to drive cancer genomics research. The Company has published over 20 papers in Nature Genetics, Cancer Cell, Nature Communications, PNAS, and other internationally recognized academic journals, accelerating the clinical translation and commercialization of scientific research and continuously improving the reliability and accessibility of its products and technology. Genetron Health is committed to making available advanced and reliable precision medicine technology to the community.

About the AACR

Founded in 1907, the American Association for Cancer Research (AACR) is the first and largest cancer research organization dedicated to accelerating the conquest of cancer. It has grown from its earliest 11 members to over 47,000 members in 127 countries and territories. The mission of AACR is to prevent and cure cancer through research, education, communication and collaboration. Through its programs and services, the AACR fosters research in cancer and related biomedical science; accelerates the dissemination of new research findings among scientists and others dedicated to the conquest of cancer; promotes science education and training; and advances the understanding of cancer etiology, prevention, diagnosis, and treatment throughout the world. The AACR Annual Meeting is one of the largest cancer research conferences in the world, attracting nearly 20,000 professionals from across the globe each year.
