Genetron Health Appoints Former FDA Senior Officer Dr. Yun-Fu Hu as Chief Medical Officer

April 10, 2020

BEIJING, 10 April 2020 - Genetron Holdings Limited ("Genetron Health"), a China-based precision oncology company, today announced the appointment of Dr. Yun-Fu Hu as Chief Medical Officer. A former deputy director with the US Food and Drug Administration (FDA), Dr. Hu will be tasked to steer the company forward in its in vitro diagnostic (IVD) devices registration and regulatory affairs as well as bio-pharmaceutical services business.

Genetron Health Appoints Former FDA Senior Officer Dr. Yun-Fu Hu as Chief Medical Officer

Dr. Hu has over two decades of experience in regulatory and managerial capacities related to medical devices and pharmaceutical industries. During his tenure at FDA, he has led a team of staff in premarket reviews and post-market compliance of IVD products and laboratory-developed tests (LDTs) for genetic testing, molecular cancer diagnostics, companion diagnostics, radiodosimetry, digital pathology and artificial intelligence devices. Some of his notable authorizations include: the first next generation sequencing (NGS)-based LDT as companion diagnostics (CDx) (Foundation Medicine FoundationFocus CDxBRCA); the first NGS-based CDx kit (ThermoFisher Oncomine Dx Target Test); the first NGS-based LDT for tumor profiling (MSK-IMPACT) and later on FoundationOne CDx); the first liquid biopsy test for NSCLC (Roche Cobas EGFR Mutation Test v2); and FDA's only two approved cancer screening tests in the last decade (Exact Sciences' Cologuard and Epigenomics' Epi ProColon). Dr. Hu and his team have also won over 10 FDA-level group awards for outstanding contributions in FDA authorization of many such first-of-its-kind devices.

Prior to joining FDA, Dr. Hu has more than 10 years of product development experience in diagnostic and pharmaceutical industries, leading his teams to achieve outstanding results in biomarker discovery and diagnostic development.

Sizhen Wang, Genetron Health's co-founder and CEO, said, "Dr. Hu's caliber and depth of experience in molecular cancer diagnostics and pharmaceutical R&D is nothing short of exceptional. Hailed with outstanding regulatory background and solid industry experience, he is a perfect hybrid talent in the global biopharmaceutical field. With Dr. Hu joining our leadership team, he will value-add to our molecular diagnostic business with international best practices in technical R&D, product design, clinical approval and policy and regulatory matters. I believe he will be an asset to Genetron Health and the industry in driving high quality and high efficiency clinical adoption of more innovative technologies."

Dr. Hu said, "China has a unique advantage in precision oncology clinical data. We have witnessed the emergence of many outstanding companies, related technologies and products in recent years. I am truly impressed with the global vision shown by the leadership at Genetron Health. I believe Genetron has massive growth potential, driven by the company's continuous innovation capabilities. I am delighted to be part of this team and I look

forward to assisting the clinical adoption of Genetron's innovative technologies and the establishment of a global one-stop bio-pharmaceutical service platform. It is our hope to bring high quality China biotechnology to the world."
